# HUBBARD PREMIUM

Since nearly 50 years, Hubbard is the uncontested **leader in the global market for PREMIUM products**. In addition to their possible colour differentiation, these specific products are also characterised by its slower growth and very good robustness. Speciality chickens have found their rightful place among local traditional breeding practices around the world. Its future will be guided by the necessity to respond to quality guidelines, consumer demand for high(er) animal welfare standards and increased production of poultry sold under strong brand names.
